Friday Challenge #22

1 min read

Friday Challenge #22

Solving coding challenges is a great way to practice your programming skills.

Explore the task in the attachment below.

Both the first person who comes up with a **working solution** as well as the person who provides the best solution will be awarded 20 loyalty points. You can also provide partial solution. Please, share your solution with us via the Java_Chapter@luxoft.com till 15th of March EOD.

If you've got **your own programming challenge** in mind for your fellow experts, reach out to us by sending an email to Java_Chapter@luxoft.com and get 30 loyalty points.

Good luck!

UPD: JSON is ok. x, y are coordinates of the left top vertex for square and rectangle. You can use similar approach for circle if you prefer – coordinates of the enclosing square
